**Helping people make a difference in Westmoreland County**

**Spring 2008**

## 2008 – Time to Reassess Our Success

Westmoreland Cleanways, originally PA CleanWays of Westmoreland County, was founded and built on the strength of committed individuals who wanted to clean up the tons of trash that scarred some of our county's most beautiful lands. Since 1990, volunteers, sponsors and supporters have cleaned up over 1,500 tons of trash and 18,642 tires from illegal dumpsites across the county. In addition, Fugitive Tire groups collected an additional 44,671 tires, and 5,944 tires were collected by municipal public works crews through our TRAP program.

Illegal dumping almost always occurs in remote and isolated places, where few people live and few people travel. Often, the trash is thrown over hillsides completely out of sight of passing motorists. As a result, many people are unaware that the problem exists, much less of its widespread prevalence.

In 1991, PA CleanWays performed the first county-wide dump survey to increase the public's awareness of the problem, thus providing a basis for community and government support. At that time, 106 sites each containing more than one pick-up truck load of trash were identified. A more extensive survey was completed in 1996 (published in 1997) in order to increase public awareness of the problem and to assess PA CleanWays' effectiveness thus far in combating the problem.

In comparing the 1991 results to 1996, an additional 36 sites were identified which surveyors believe

existed but were overlooked in 1991. Including the 19 sites that were cleaned up during that time, a total of 161 dump sites were documented in the 1997 survey, with 60 of those sites cleaned.

Westmoreland Cleanways has come a long way since 1997. The last few years have seen a slowing of our cleanup activities for several reasons. The very large dumpsites originally identified in 1991 were cleaned up and have stayed clean. With the expansion of our education efforts, people are becoming more aware of the environmental dangers posed by illegal dumping; and, through our collection events for hard-to-dispose items, people understand that they have proper disposal alternatives available for the types of trash generally seen in dumpsites.

10 years later, it is time to re-assess our success. Westmoreland Cleanways, in partnership with PA CleanWays, Inc., has scheduled another full county-wide illegal dump survey for the fall of 2008. Surveyors will once again physically travel every public roadway in the county looking

for sites. Data collected will include the name of the road and municipality; GPS coordinates of the site; proximity to waterways and wetlands; visibility of the site; and type and quantity of trash present.

Funding for this latest survey will be provided through the PA Department of Environmental Protection and the Greensburg Foundation Fund of the Community Foundation of Westmoreland County.

When complete, the Westmoreland County illegal dump survey will become part of PA CleanWays, Inc.'s Statewide Illegal

(con't. on P. 2)

Dump Survey and Cleanup initiative to be published in 2012. The overarching goal of the initiative is not only to document the problem but to showcase the efforts and accomplishments of Westmoreland Cleanways and PA CleanWays and its many partners who are working to make Pennsylvania a cleaner and greener place in which to live, work, and visit.

Westmoreland Cleanways is eager to begin the 2008 Illegal Dump Survey to find out for ourselves just how successful we've been in not only cleaning up the known sites but in deterring the occurrence of new sites. We are aware, of course, that pockets of trash still exist out there. We know some roads to be perennial dumpsites that volunteers clean up again and again, only to have more trash and tires turn up as soon as the volunteers pull away. In some respects, we're victims of our own success. Dumpers know that "someone" will clean up the trash, so they take advantage of the concern respectful residents have for their environment. Other people have gotten complacent and believe that reporting a site to Westmoreland Cleanways is good enough – that we will "send somebody out" to clean up the site. The personal initiative and stewardship for organizing cleanups has gotten lost in the shuffle.

It takes a whole lot of effort to organize a cleanup. While

Westmoreland Cleanways has the technical expertise and partnerships in place to accomplish the logistics, it takes personal commitment and pride from ordinary people with a personal stake in the property to truly call it a success. We hope that, as a result of the 2008 survey, the spark will once again be lit in the hearts of residents, municipal leaders, business owners, and everyone with a stake in making our county a healthier and more beautiful place in which to live and work.

Take a look again at the photo on the first page. Does this furniture look familiar? Do you know someone who's been bragging about getting new furniture? The sofa is white, the carpeting is light blue, and there's even a full-sized mattress. It was photographed on 11/30/07 on Armel Hollow Road in Unity Township.

We'd like to get a jump on the 2008 illegal dump survey by collecting leads, tips and photos now. If you are aware of an illegal dumpsite, big, small, tires, appliances, household trash, whatever, won't you drop us a note with the information? Pass the word to your neighbors and municipal officials, too. We'll need the name of the road, municipality, and any landmarks that would help us identify the site.

## Great PA Cleanup

Westmoreland Cleanways is facilitating several cleanups this season, in addition to assisting groups who register for the Great PA Cleanup. This program sponsored by Keep Pennsylvania Beautiful provides cleanup supplies and free disposal for groups that register and conduct their cleanups between March 1 and May 31.

The theme of this year's campaign is "Let's Pick It Up, PA!" You can call us to register, or you can go directly to the Great PA Cleanup website at [www.greatpacleanup.org/events/registeranevent.asp](http://www.greatpacleanup.org/events/registeranevent.asp) and register yourself. Either way, you must be registered by April 11 in order to receive an event registration/ID number. You will have to present your ID number at the landfill to qualify for free disposal provided by the PA Waste Industries Association. We have a supply of bags and vests available in our office for your convenience. If you think your cleanup will require special equipment, please let us know so we can visit the site if necessary.

As we go to print, following are some of the cleanups that Westmoreland Cleanways is helping to coordinate. Call us at 724-836-4129 to learn how you can volunteer, or to schedule your own event.

- ◇ April 13 / 4H Conservation Club / Pleasant Valley Park, Murrysville
- ◇ April 19 / Sewickley Creek Watershed Association / Youngwood/Armbrust/Mt. Pleasant Township areas
- ◇ April 24 / Pittsburgh Explorers Club, Twin Maples Hunt Club, Local Residents / High Rocks, Derry Borough
- ◇ June 7 / Friends of Keystone State Park / Various Sites in Park, Derry Township

### Spring Clean Up and Clean Out—2008 Community Cleanup Days\*\*

Where: Donegal Township and Borough  
RESIDENTS ONLY

When: Last Week of April  
What: Furniture, mattresses, TVs  
Tires (off rim only)

Cost: Fee for tires  
CAN'T TAKE: Freon appliances (refrig/freezers)  
For more info: 724-593-6309

~~~~~  
Where: Ligonier Township & Borough, Laurel  
Mountain Borough  
RESIDENTS ONLY

When: April 19, 9 a.m.—Noon  
What: Tires, bulky waste,  
Cost: \$10.00 per truckload, \$5.00 per carload,  
\$2.00 for regular-sized tires (tires on rims  
\$4.00), \$5.00 for large-sized tires (tires on  
rims \$10.00), \$15.00 for freon-containing  
appliances and \$10.00 for other  
appliances.

CAN'T TAKE: Paint, pressurized paint cans, hazardous  
materials, items containing dirt, C&D,  
household garbage, broken glass and  
grass clippings.

For more info: 724-238-2725

~~~~~  
Where: City of New Kensington City Garage  
RESIDENTS ONLY

When: First week in May  
What: Tires, scrap metal/appliances, bulky  
waste, yard waste, building materials

Cost: \$2.00/tire  
For more info: 724-335-5421

~~~~~

Where: Borough of Trafford  
When: April 18 & 19  
What: Tires, batteries, appliances, household  
items, bulky waste

For more info: 412-372-7652

~~~~~

Where: Upper Burrell Municipal Building  
RESIDENTS ONLY

When: May 8  
What: Tires, Scrap metal/appliances, Bulky  
waste, yard waste

Cost: \$2.00 car/lt truck off rim; \$5.00 on rim;  
\$10.00 lg. truck tire off rim; \$13.00 on  
rim

Bulky waste charged by vehicle size  
CAN'T TAKE: freon appliances; HHW, C&D, batteries  
For more info: 724-335-3517

~~~~~

Where: Washington Township  
RESIDENTS ONLY

When: May 5 through 9; 7 a.m.—7 p.m.  
What: Scrap metal/appliances; Bulky  
waste, yard waste

CAN'T TAKE: freon appliances  
For more info: 724-727-3515

## Collection Season Begins

Our first tire/battery/appliance/scrap metal collection will be held on April 12 at Keystone State Park in Derry Township. This will be the fourth year of partnering with the park's annual cleanup day.

Since it is also the first day of trout season, the Keystone Friends of the Park Committee will be selling breakfast, lunch, drinks and snacks beginning at 6:00 a.m. You can eat, fish, and recycle all at the same time. How much better can life get?

Other spring collections will be in Vandergrift on April 19, Delmont on May 3, and Murrysville on June 7.

Items to be collected and cost are as follows:

### Tires:

Automobile/light truck off rim: \$1.75  
Automobile/light truck on rim: \$2.75

OTR/Heavy Equipment tires: \$22.00 & up

Tractor Tires: \$17.00 & up

Tractor Trailer tires off rim: \$8.00  
Tractor Trailer tires on rim: \$12.00

\*Westmoreland Cleanways members receive discount on tire disposal\*

Freon Appliances \$20.00/each

Other appliances/scrap metal FREE

Vehicle Batteries FREE

Cell phones, CFLs, Ink Cartridges FREE

### 2008 Collection Sponsors

Dan's Tire  
Salandro's Refuse, Inc.  
Appliance Warehouse  
Keystone State Park  
Vandergrift Improvement Program  
Carmike Cinemas  
Municipality of Murrysville  
Westmoreland Cleanways volunteers

## WESTMORELAND CLEANWAYS QUARTERLY CALENDAR SPRING 2008

### APRIL

- 1 Earth Month Begins—Great PA Cleanup
- 5 "Talkin Trash" with 1480 WCNS 8:30 a.m.
- 5 Fugitive Tire Program
- 5 Backyard Composting Workshop The Barn at Donohoe Center 9 a.m.—Noon
- 10 Monthly Meeting 6:30 p.m.
- 12 Fugitive Tire Program
- 12 Tire/Battery/Appliance Collection Keystone State Park 9 a.m.—Noon
- 13 2008 RECYCLING GUIDE in Tribune Review
- 13 Pleasant Valley Park Cleanup—Murrysville
- 19 GREAT PA CLEANUP
- 19 Sewickley Creek Watershed Cleanup— New Stanton/ Armbrust/Mt. Pleasant areas
- 19 Vandergrift Community Cleanup (tires/scrap metal/bulky items) 9 a.m.—2 p.m.
- 19 Fugitive Tire Program
- 19 Westmoreland Earth Day St. Vincent College Noon—5 p.m.
- 26 Fugitive Tire Program
- 26 High Rocks Cleanup—Derry Boro

### MAY

- 3 "Talkin Trash" with 1480 WCNS 8:30 a.m.
- 3 Backyard Composting Workshop Winnie Palmer Nature Reserve 9:30 a.m.

### MAY—con't.

- 3 Tire/Battery/Appliance Collection Wynnsong Theater, Delmont 8:30 a.m.—Noon
- 8 Monthly Meeting 6:30 p.m.
- 10 Backyard Composting Workshop Oak Hollow Park, N. Huntingdon 9 a.m.—11 a.m.
- 10 Master Gardener Plant Sale Donohoe Center 8 a.m.—1 p.m.
- 17 Backyard Composting Workshop The Barn at Donohoe Center 9 a.m.—Noon
- 24 Electronics Collection Allegheny Township Mun. Bldg. 9 a.m.—1 p.m.

### JUNE

- 7 "Talkin Trash" with 1480 WCNS 8:30 a.m.
- 7 Keystone State Park Cleanup Derry Township
- 7 Tire/Battery/Appliance Collection Murrysville Municipal Building 8:30 a.m.—Noon
- 12 Monthly Meeting 6:30 p.m.
- 14 Backyard Composting Workshop The Barn at Donohoe Center 9 a.m.—Noon

### JULY

- 5 "Talkin Trash" with 1480 WCNS 8:30 a.m.
- 3-6 Westmoreland Arts & Heritage Festival

Call our office for details on any event

## What is Your Carbon Footprint?

It seems everywhere you turn, alarms are being raised about global climate change and the looming environmental crisis. The problem seems so huge, we wonder how anything we do can possibly make a difference. The bottom line is, we can only control our own behavior and hope the rest of the world will follow suit.

Scientists say that global climate change is caused by the overload of greenhouse gas emissions into the atmosphere. A primary source of greenhouse gas emissions, measured in carbon equivalents, is the pollution entering the atmosphere from burning fossil fuel. The burning of fossil fuel in turn can be traced to energy production, either for transportation (personal or mass transit) or to power manufacturing plants that make the goods we use every day. Again, you say, "How can what I do make an impact on global warming?" The answer is, each person making environmentally responsible changes to their lifestyle can have a major impact when taken collectively. And, if enough individuals demand that industry leaders become more environmentally responsible, the cumulative effect will be a major reduction in greenhouse gas emissions and cleaner air as a result.

What does recycling have to do with greenhouse gas emissions and carbon equivalents? It has to do with the amount of energy that is consumed to produce an item from raw material versus recycled material. Take aluminum, for example, a metal that can be recycled almost indefinitely. First the bauxite ore is mined in places like Australia or West Africa; then it has to be shipped to the U.S., transported to a smelter where the aluminum ore is removed; the aluminum ore is processed with other ingredients into a liquid and poured into sheets, and then the sheets are fabricated into cans or other aluminum products. Imagine the energy used in each one of those phases.

Then, consider the journey of a recycled aluminum can. From your house, it goes to the curb where it is picked up by the recycling truck and delivered to the recycling plant; there, it is sorted into another pile of aluminum cans, baled, and shipped to an aluminum processing plant; at the processing plant, it is melted down, poured into sheets, and stamped into new products. It is estimated that recycling an aluminum can saves 95% of the energy needed to make aluminum from the raw material. With this illustration, it's easy to see how that can be.

Here in Westmoreland County, we collectively recycled 19,554 tons of material and sent 292,915 tons of trash to a county landfill, roughly a 6% diversion rate. Not very good when you consider that the state's recycling goal is 35%. But that 19,554 tons of recycling resulted in a reduction of greenhouse gas emissions (measured in metric tons of carbon equivalent) of 13,081 TONS. Put another way, it was like saving 50,407 barrels of oil, or taking 4,225 cars off the road or saving 2,353,213 gallons of gasoline!

Your efforts do make a difference, and will continue to add up. Westmoreland Cleanways is working diligently to provide additional and more comprehensive recycling options for residents and businesses through education and programming.

## The Digital Revolution

As reported in our Winter 2007 newsletter, Westmoreland Cleanways is very concerned about the pending change-over of analog to digital television signals on February 17, 2009. While, by all accounts, satellite and cable subscribers will not be affected, people who rely on over-the-air signals, rooftop antennae and rabbit ears will lose their pictures unless they invest in an analog-to-digital converter box.

The Federal government is offering discount coupons worth \$40 each (limit 2 per household) to defray the cost of the converter equipment. While this may seem like a bargain, the devil's advocate in me says "If my television is so old that it doesn't even have digital capability, and if the converter box is \$70-\$80 (without the coupon), I might as well invest a little bit more and get a whole new television."

Whichever way you look at it, there is a real possibility that a lot of people will have TVs to get rid of. For the latest information on the digital TV switchover, and to receive your discount coupons, visit [www.dtv.gov](http://www.dtv.gov).

Check out Page 6 for information on Westmoreland Cleanways' first electronics collection scheduled for May 24 in Allegheny Township. We hope to schedule additional electronics collections in the future to properly dispose of televisions and other household electronics.

## Pennsylvania Material Trader

We're continually finding resources to help people dispose of material, either by recycling it or by finding someone else who can use it. Pennsylvania Material Trader provides an opportunity for businesses to connect with each other to save money on waste disposal and raw material cost. Participants can list material they need or items they have to dispose of. The online service is free and confidential (materials may be offered at a nominal cost). Check them out at [www.materialtrader.org](http://www.materialtrader.org).

## Newsprint as Animal Bedding

A number of years ago, before Westmoreland County had options for recycling paper, one of the more popular uses for old newsprint was as animal bedding. Several farmers in the area had obtained shredders through the DEP which enabled them to shred paper and telephone books and use the paper in their barns. In fact, that was the destination of the telephone books that were collected when Waste Management and Verizon (then Bell of PA) sponsored our telephone book collections each winter.

Once Westmoreland Cleanways started its drop-off paper recycling program in 2001, there was no longer a need to conduct a separate telephone book collection. As a result, Westmoreland Cleanways' referral list became out-of-date and we lost touch with farmers who still need and want newsprint and/or telephone books for use as animal bedding.

As mentioned in the Winter 07 By The Way, Abitibi, the company that now operates the paper recycling program, will not accept telephone books; thus, as of July, 2005, we no longer had a market for them. But people got used to recycling them! Westmoreland Cleanways' office is flooded each year with phone calls asking what to do with telephone books when the new directories are distributed. This year was no exception. Not only were individuals calling, but businesses that had hundreds of directories simply would not just throw them away.

At just about the same time, we received an email from Vickie Baker at Maple Bottom Farm near Scottdale looking for newsprint for her herd of cattle. Well, Vickie's call couldn't have come at a better time. I was able to put her in touch with the companies that had called with large quantities of phone books, and a match was made.

Being able to help the Bakers got us thinking about other farmers who still use shredded paper for animal bedding, and about other companies who may have large volumes of newsprint or telephone directory-type catalogs to dispose of.

If you are a farmer in need of shredded paper for animal bedding, please contact our office to be put on our referral list. And, if you are a generator of paper that can be used for animal bedding, call so we can match you with a farmer who can use your material. What a great example of recycling and reuse!

## E-Cycling Event Scheduled

Westmoreland Cleanways, in partnership with the Roaring Run Watershed Association, has scheduled an Electronics Recycling Collection to provide area residents and small businesses the opportunity to properly dispose of computers and household electronic items.

The Roaring Run Watershed Association has been protecting the waterways around Apollo since 1982. They manage 652 acres of land, open to the public for hiking, picnicking and enjoying the recreational opportunities along the Kiski River. RRWA volunteers have spent countless hours cleaning up acres of dump sites and other sources of pollution to create the scenic retreat in the heart of the watershed. To celebrate 25 years of service to the community, the directors wanted to do something special to highlight their accomplishments and continue their commitment to eliminating sources of environmental pollution. Environmental Committee Chairman John Linkes contacted Westmoreland Cleanways to propose a joint project. We at Westmoreland Cleanways were only too happy to work together with the Roaring Run Watershed, long-time partners in many cleanup efforts. Thus, the idea of an electronics collection was borne.

The electronics recycling collection is scheduled for Saturday, May 24, 2008 at the Allegheny Township Municipal Building, 136 Community Building Road, Leechburg, PA 15656. Time of the collection will be from 9 a.m. to 1 p.m. The collection is open to all residents and small businesses wishing to safely and properly dispose of computers and other household electronic items. Scott Electric and USA Lights will deconstruct the items, reclaim the metals, glass and other recyclable material where possible, and safely dispose of the material that is not recyclable. Modest fees will be charged on a per unit basis. Westmoreland Cleanways and Roaring Run Watershed Association members will receive a discount on the disposal fee. A complete price list can be downloaded at [www.westmorelandcleanways.org](http://www.westmorelandcleanways.org).

Computers, televisions and other electronics contain materials such as lead, cadmium and mercury, which can pose a risk to human health and the environment. Improper handling or disposal of these units may contaminate soil or water. While federal and Pennsylvania law currently does not ban the disposal of consumer electronics from landfills, waste industry experts and environmental organizations agree that the large volume of electronics in need of disposal definitely presents a challenge to landfill operators to keep them safe. In addition, collectively, the amount of metals that can be reclaimed becomes a valuable commodity that can be recycled into new electronic components.

For more information about the May 24 Electronics Recycling Collection, call our office at 724-836-4129.

## Special Events Recycling

As this newsletter is being prepared, the day is still quite chilly, but we know that community and volunteer groups throughout the county are beginning to prepare for the summer festival season. Westmoreland Cleanways would like to remind you that we have available ClearStream Recyclers, collapsible containers for collecting recyclable plastic bottles and aluminum cans. Capturing the recyclable bottles and cans from your special event can substantially reduce the volume of trash that ends up in the landfill and will show your community that you care about our environment.

After initial successes recycling at three of the Rolling Rock Towne Fairs and the Westmoreland Arts & Heritage Festival, Westmoreland Cleanways wanted to expand the Special Events Program by purchasing recycling bins that we could loan to interested community groups. We were able to do just that with a grant from the Katherine Mabis McKenna Foundation. With the purchase of the ClearStream Recyclers, we were able to partner with the Westmoreland County Bureau of Parks and Recreation to expand the Westmoreland Arts & Heritage Festival recycling effort at Twin Lakes Park. Organizers of the annual Hempfield Fall Festival and several other community and church festivals also took advantage of the opportunity to recycle. Last year for the first time, we worked with the Westmoreland Fair Board to recycle at the Westmoreland Fair.

Recyclables collected at Rolling Rock Towne Fair, 2005

The ClearStream Recyclers and bags are available on loan to event organizers at no charge. Westmoreland Cleanways can assist with setting up the recycling program. Event organizers arrange to pick up and return the bins, and for the disposition of the recyclables at a recycling center. To reserve bins for your event, call Westmoreland Cleanways at 724-836-4129.

## P-E-T Fun Facts

Our thanks to the people at NAPCOR (National Association for PET Container Resources), who were instrumental in helping Westmoreland Cleanways get its Special Events Recycling program started. They provided technical assistance and arranged for a joint program with Pepsi Cola to obtain special bottle-shaped recycling containers that were used at the Westmoreland Arts & Heritage Festival and at Westmoreland Earth Day at St. Vincent College.

Consider this - Westmoreland Cleanways collected over 1,000 lbs. of bottles through its Special Events Recycling Program in 2006-2007. That's 16,000 or 18,000 bottles, depending on how you look at it. That's a lot of pop!

Now, did you know that:

- ◇ PET or PETE stands for Polyethylene Terephthalate
- ◇ There are approximately 18 16 oz. bottles or 16 20 oz. bottles in one lb. of plastic.
- ◇ Recycling 4,800 16 oz. bottles saves one cubic yard (3 x 3 x 3) of landfill space
- ◇ Recycling one ton of PET containers saves 7.4 cubic yards of landfill space
- ◇ You can make one XL t-shirt using 14 20 oz. PET bottles
- ◇ Since 1978, manufacturers have reduced the weight of a 2-liter PET bottle from 68 grams to 48 grams. It wasn't your imagination—the bottles are thinner!

Ben Wright saving enough bottles to make himself an EarthDay t-shirt

## Recycling Comes to the Northeast

Westmoreland Cleanways proudly announces a new recycling program that will start up this spring to serve the communities of Bolivar, New Florence and Seward Boroughs and St. Clair Township. In response to requests from members of the various communities for advice on how to make recycling available to their residents, we called on our friends from Waste Management. Without missing a beat, they agreed to place a recycling rolloff container at the Roadway Plaza on Rt. 711 on a trial basis. We were also able to secure an underwriter for the cost of educational brochures that will be mailed to all residents of those communities.

Material to be collected will include: newspaper, #1 and #2 plastic, aluminum cans, bimetal cans, and clear/green/brown glass.

We are very happy to begin this new venture with Waste Management, and thank Felix Szymkowiak from Roadway Plaza, QuatriniRaffertyGalloway for underwriting the cost of the educational material, and the officials from each municipality for their support.

## What We're All About

Westmoreland Cleanways is a non-profit 501(c)(3) organization whose mission is to protect, restore and maintain the environmental qualities of our county for the benefit of all who live, work, and visit herein. Westmoreland Cleanways accomplishes its mission by sponsoring and promoting programs that address the proper disposal of solid waste through recycling, special collections, and the cleanup of illegal dumpsites and littered areas. We educate the public through presentations, print media and the web.

Westmoreland Cleanways initiates and facilitates programs by bringing together a network of volunteers, industry leaders, and state and local government representatives to provide services in the most efficient and economical manner. We are funded by the county commissioners, member fees, private donations, sponsorships and grants. Volunteers donate time, energy and expertise to carry out our mission.

Volunteers and new members are always welcome. Won't you call our office, visit us on the web, or attend a meeting to learn more about how you can be a part of Westmoreland Cleanways?

### ~ MEETING NOTICE ~

Regular meetings are held at 6:30 PM in the Westmoreland Conservation District Barn, 218 Donohoe Road, Greensburg, on the second Thursday of every month (except July & December). Call 724-836-4129 for information. Everyone is welcome.

We hope you enjoyed our newsletter. To support our activities, please become a member. Return this coupon and your payment to Westmoreland Cleanways, 226 Donohoe Road, Suite 101, Greensburg, PA 15601-7470.
